# Energy Management Policy

GIGABYTE Technology, with the core value of "Smart Innovation × Green Sustainability," continuously integrates digitalization and smart manufacturing technologies, and through the ISO 50001 Energy Management System, builds high-efficiency, low-carbon green factories and products.

We commit to:

1. Regulatory Compliance: Committed to complying with applicable energy-related laws and regulations, while actively promoting a sustainable energy transition.

2. Continuous Improvement: Establish Energy Performance Indicators (EnPI) and continually enhance the effectiveness of the energy management system and overall energy performance.

3. Smart Design and Procurement: Implement sustainable procurement practices and adopt high-efficiency, energy-saving equipment and products to improve energy utilization.

4. Employee Empowerment: Strengthen employees' knowledge and competence in energy management, encouraging full participation and innovation across the organization.

5. Partnership Collaboration: Collaborate with value-chain partners to enhance low-carbon competitiveness and operational resilience across the industry.

6. Resource Assurance: Ensure the provision of necessary resources, competence, and support for the effective implementation and continual improvement of the energy management system.

7. Transparency and Disclosure: Continuously monitor and publicly disclose energy performance to stakeholders, maintaining transparency and accountability.
