

Environmental Policy

To reduce the environmental impact of its operations and processes on the environment, and actively protect the health and safety of employees, GIGABYTE continuously promotes environmental management and implements the stakeholder protection of stakeholders as the Company firmly adheres to its core commitment to sustainable development. GIGABYTE has established this Environmental Policy. The Policy applies to GIGABYTE Group and its domestic and overseas subsidiaries and requires supplier partners to jointly comply with environmental protection laws and regulations.

Our commitment:

- Comply with environmental protection regulations and international standards.
- Implement clean production and pollution prevention, while setting management goals and improvement plans to enhance environmental management performance and reduce environmental impact.
- Fulfill the obligations and responsibilities of environmental protection and promoting the safety and health of employees.
- Encourage contractors to implement environmental, safety, and health (ESH) measures.
- Voluntarily control or reduce greenhouse gases and continue to conserve energy and resources.
- Consider the product life cycle and continuously increase the recycling and reuse rates, ensuring that materials comply with regulations related to environmentally prohibited substances.
- Communicate with all personnel working under the Group's control to raise awareness of their environmental safety and health responsibilities.
- Provide employee training to strengthen environmental awareness and understanding of the company's impact on the environment.
- Actively communicate with and understand environmental concerns of internal and external stakeholders for further policy formulation.
